

CONTENTS

FOREWORD	xi
COMMITTEES	xiii
A. SOCIO-ECONOMIC ASPECTS OF FLOOD RISK MANAGEMENT	1
A1. URBAN DEVELOPMENT AND FLOOD RISK MANAGEMENT PLANS	
Developing business-as-usual scenarios for the urban growth of four Asian megacities <i>William Veerbeek, Chris Zevenbergen</i>	3
Towards a decision support tool for adaptive flood risk management in an urban catchment <i>Suleman Shaikh, Stefan Kurzbach, Natasa Manojlovic</i>	5
The relationship between flood probability and the environmental transformation efficiency of urban development <i>Hsiang-Leng Chen, Hsing-Fu Kuo, Ko-Wan Tsou</i>	7
A theory of 5R-layer framework for urban flood resilience – a basis for alternative planning practices, Dhaka case study <i>Fang-Yu Hu, David M. Khan</i>	9
An exploration of multifunctional flood defences with an emphasis on flexibility <i>Flora Anvarifar, Chris Zevenbergen, Wil Thissen</i>	11
* Super levees along the Arakawa river in Tokyo: Evaluation from the viewpoint of spatial planning in a low-lying area <i>Hitoshi Nakamura, Takaaki Kato, Yuto Shiozaki</i>	13
* Using satellite imagery to assess the influence of recent urban development on the impacts of extreme rainfall <i>Per Skougaard Kaspersen, Martin Drews, Karsten Arnbjerg-Nielsen, Henrik Madsen</i>	15
* Flood risk management framework and strategies for sustainable flood management <i>Ick Hwan Ko, Min Goo Kang, Sung Je Park</i>	17
* Sewerage system flood control adapted to environmental change in Yokohama City <i>Hiroaki Mutou, Yoshio Kurobane, Toru Meguro, Shuhei Okuno</i>	19
A2. FLOOD RISK UNDER CLIMATE CHANGE AND GROWTH SCENARIOS	
Assessing flood risk in London under climate and land use change <i>Claire L. Walsh, Richard J. Dawson, Stuart L. Barr, Alistair C. Ford, Jim W. Hall, Mike Batty</i>	21
Informing long term planning decisions – scenario analysis for future flood management in the Taihu Basin, China <i>Jon Wicks, Chaoqing Yu</i>	23
Flood hazard assessment considering climate change impacts – application to Barcelona case study using a 1D/2D detailed coupled model <i>Beniamino Russo, Marc Velasco, David Suñer</i>	25

Scenarios for long-term economic city growth – models and results for selected CORFU case studies <i>Friso Schlitte</i>	27
Multiple linked SUDS in hydrological modelling for urban drainage and flood management <i>Sandra Hellmers, Stefan Kurzbach, Natasa Manojlovic, Giovanni Palmaricciotti</i>	29
* Two fiscal front-runners: Will their economies crumble due to the lack of flood resilience? <i>Komali Kantamaneni, Michael Phillips</i>	31
* A study of the Beijing intensity-duration-frequency curves <i>Yuwen Zhou, Ying Tang, Jian Zhao, Hongli Wang, Chang Liu</i>	33
* Automated model-based flood risk mapping for future scenarios of urban growth and climate change <i>Stefan Kurzbach, Natasa Manojlovic, Sandra Hellmers</i>	35
* Estimating and mapping the total economic costs from storm surges in Wilhelmsburg/Hamburg <i>Julia Kowalewski, Gehad Ujeyl</i>	37
* MRI-AGCM 3.2s precipitation based flood damage assessment study for Lower West Rapti River Basin in Nepal <i>Edangodage Duminda Pradeep Perera, Akiko Hiroe, Dibesh Shrestha, Kazuhiko Fukami, Divas Bahadur Basnyat, Surendra Gautam, Akira Hasegawa, Toshiya Uenoyama, Shigenobu Tanaka</i>	39
A3. POLICY INSTRUMENTS AND GOVERNANCE ISSUES	
Integrating innovative flood resilience measures: Lessons from Europe <i>Stephen Garvin, Iain White, Paul A. O'Hare, Angela Connelly, Nigel Lawson</i>	41
How science and technology support the decision making in response to typhoons in Taiwan <i>Wei-Sen Li, Liang-Chun Chen, Lee-Yaw Lin</i>	43
Learning and action alliances for innovation and active learning in a European context <i>Elizabeth Dudley, Richard Ashley, Natasa Manojlovic, Sebastiaan van Herk, John Blanksby</i>	45
Resilience to flooding – draft building code <i>John D. Clarkson, Kenton Braun, Angela Desoto-Duncan, Graeme Forsyth, Jarit G. de Gijt, Nils P. Huber, Dale Miller, Philippe Rigo, David Sullivan</i>	47
The status of stormwater governance in Barbados <i>Jenna Blackwood, Adrian Cashman</i>	49
Actions for improving the Science-Policy Interface for flood risk management <i>Mark Morris, Derk van Ree, Karin Stone</i>	51
A4. FLOOD RISK PERCEPTION	
Communicating uncertainty in flood risk messages – understanding and risk perception <i>Ailsa Strathie, Gina Netto, Guy Walker, Gareth Pender</i>	53
Exploring preparedness consciousness in Wilhelmsburg (Hamburg): Is the risk 'real' to the people on the Elbeinsel? <i>Sharon Birkholz, Paul Jeffrey</i>	55

Evaluation of a specific action to encourage people at risk of flooding to adapt their behaviour <i>Julien Jadot, Isabelle Richard, Nicolas Bauduceau, Karine Weiss, Anne-Laure Moreau, Rodolphe Pannier</i>	57
The value of partnership working during flood recovery: Done with or done to? <i>Alison McNulty, Kimberley Rennick</i>	59
B. MAPPING AND ASSESSMENT OF FLOOD IMPACTS	61
B1. FLOOD HAZARD MAPPING	
Thinking big: national scale flood mapping <i>Yong Wang, Luke Lovell, Jon Wicks</i>	63
Real-time flood risk mapping for warning decision support <i>Jiun-Huei Jang, Chen-Yi Chen, Keh-Chia Yeh, Su-Chin Chen, Horng-Yue Chen, Liang-Chun Chen</i>	65
Real-time hazard impact modelling of surface water flooding: Some UK developments <i>Steven J. Cole, Robert J. Moore, Timothy Aldridge, Andy Lane, Stefan Laeger</i>	67
Urban flood inundation in Mumbai <i>Arun Rana, Justine Hénonin, Lars Bengtsson, Ole Mark</i>	69
Breach risk evaluation of the railway embankment between Arles and Tarascon, France <i>Mark Cheetham</i>	71
Sharing UK LIDAR and flood mapping experience with the Philippines <i>Alastair Duncan, Patrick Hogarth, Enrico Paringit, Mahar Lagmay</i>	73
The role of the second embankment line in flood defence – case study of Novi Sad <i>Matija Stipić, Srđan Kolaković, Rihard Šranc, Đula Fabian, Ljubomir Budinski</i>	75
Vulnerability analysis for addressing pluvial flood risk in a densely urbanized area in Osaka <i>Taira Ozaki, Taisuke Ishigaki, Norihiro Asano, Keiichi Toda</i>	77
Predicting private sewer collapse to help utilities manage flooding and pollution events <i>Ben Ward, Andrew Selby, Simon Gee, Dragan A. Savić</i>	79
Flood inundation mapping of Surat City: A prospective view of flood return period <i>Dhruvesh Patel</i>	81
* Flood hazard mapping for the Lena River Basin, Russia <i>Dmitriy Botavin, Eugenia Fingert</i>	83
* Floodplain mapping of lowland area rivers by combination of GIS with depth-averaged 2D model <i>Mohammad Rostami, Abdollah Ardeshir, Sahar Habibi</i>	85
* Flood risk analysis and research of evacuation in flood disasters with GIS <i>Aichen Jia, Qing Zhang, Qian Yang</i>	87
* Statistical analysis of a Cellular Automata-based sewer flood model <i>Rebecca Austin, Albert S. Chen, Dragan A. Savić and Slobodan Djordjević</i>	89

B2. ASSESSMENT OF LOSSES IN FLOOD RISK ANALYSIS

A spatial analysis of rainfall damage data using C-band weather radar images <i>Matthieu Spekkers, Matthijs Kok, Francois Clemens, Marie-claire ten Veldhuis</i>	91
Flood damage assessment for urban growth scenarios <i>Albert S. Chen, Michael J. Hammond, Slobodan Djordjević, David Butler</i>	93
Estimating damage costs of urban pluvial flooding as a means of improving climate change adaptation investments <i>Anders Skovgård Olsen, Qianqian Zhou, Karsten Arnbjerg-Nielsen, Jens Jørgen Linde</i>	95
Flood damage assessment of Yizhuang, Beijing <i>Yuwen Zhou, Zilong Liu, Shanshan Liu, Jian Zhao, Wei Li, Jing Zhang</i>	97
Correlations between rainfall data and insurance damage data related to sewer flooding for the case of Aarhus, Denmark <i>Matthieu Spekkers, Qianqian Zhou, Karsten Arnbjerg-Nielsen, Francois Clemens, Marie-claire ten Veldhuis</i>	99
Flood impact assessment under climate change scenarios in central Taipei area, Taiwan <i>Ming-His Hsu, Chih-Hung Chen, Chia-Hsiu Chang, Wen-Cheng Liu, Tsang-Jung Chang, Yi-Chieh Lin, Albert S. Chen, Michael J. Hammond, Slobodan Djordjević, David Butler</i>	101

C. RESILIENCE TO FLOODING 103

C1. EVALUATION OF FLOOD RESILIENCE MEASURES

Methodology for maturity of flood risk management frameworks assessment – application to Asian and European cities <i>Jelena Batica, Philippe Gourbesville, Franck Tessier</i>	105
Assessing quick-wins to protect critical urban infrastructure from floods: A case study (three urban communities) in Bangkok, Thailand <i>Chris Zevenbergen, Khanitta Iam-la-or Kolaka, Sebastiaan van Herk, Manuela Escarameia, Berry Gersonius, Damien Serre, Nicholas Walliman, Karin de Bruijn, Rutger de Graaf</i>	107
Assessing the effects of flood resilience technologies <i>Sebastian Golz, Reinhard Schinke, Thomas Naumann, Stephen Garvin, Iain White</i>	109
On the flood and inundation management of Ho Chi Minh City, Viet Nam <i>Ruben Dahm, Ferdinand Diermanse, Ho Long Phi</i>	111
A review of flood resilience in Fiji <i>Stephen Yeo</i>	113
Flood resilience study for Mithi river catchment in Mumbai, India <i>Vinay Nikam, Kapil Gupta</i>	115
Sustainable flood memories, informal knowledges and the development of community resilience to future flood risk <i>Lindsey McEwen, Joanna Garde-Hansen, Owain Jones, Franz Krause, Andrew Holmes</i>	117
Use of new digital technology to enhance community resilience to floods <i>Sue Tapsell, Simon McCarthy, Rosalind McDonagh, Vitaveska Lanfranchi</i>	119

Methodology for flood resilience index <i>Jelena Batica, Philippe Gourbesville, Fang-Yu Hu</i>	121
Freeboard design as a technical precondition for flood resilience <i>Reinhard Pohl</i>	123
Disruption of resource movements from flooding <i>Shaun A. Brown, Richard Dawson</i>	125
* Experiences of groundwater flooding, South Winterbourne Valley, Dorset <i>Charles Bennett, Brian Richards</i>	127
* Community-based activities for the large-scale flood hazard in a low-lying area: the case of Shinkoiwa in Tokyo <i>Takaaki Kato, Hitoshi Nakamura, Yuto Shiozaki</i>	129
* Coping with floods: Preparedness, response and recovery of flood-affected residents in Germany after 2002 <i>Sarah Kienzler, Ina Pech, Heidi Kreibich, Meike Mueller, Annegret H. Thieken</i>	131
* A house is not a home – the importance of non-structural reconstruction in disaster recovery <i>Chuan-Zhong Deng</i>	133
* Urban flood mitigation by development of optimal detention ponds in urban areas: A case study <i>Abdollah Ardeshir, Kambiz Salari, Fatemeh Jalilsani, Kourosh Behzadian, S. Jamshid Mousavi</i>	135
* Gathering evidence; the multiple benefits of SUDS and designing for exceedance <i>Adam Baylis, Paul Shaffer, Chris Digman, Richard Ashley, Elliot Gill</i>	137
* SMARTeST modelling toolkit for multiscale decision making on flood resilient technology <i>Natasa Manojlovic, Thomas Naumann, Reinhard Schinke, Antonis Toumazis, Ioulia Tchiguirinskaia, Agathe Giangola-Murzyn, Daniel Schertzer, José-Frédéric Deroubaix, Bruno Barocca, Matthieu Spekkers</i>	139
* Conceptual model of city resilience to large-scale flooding in a low-lying area in Tokyo <i>Yuto Shiozaki, Takaaki Kato, Hitoshi Nakamura</i>	141
* Study on Smart Water Grid in Korea: Stable water supply using rainwater harvesting for flood preparedness <i>Woo Dalsik, Kim Seounghyun, Shin Sunghoon, Chae Sookwen, Jung Jongtae, Choi Gyecheon</i>	143
C2. RESILIENT CITIES	
A multi-layer flood safety approach towards resilient cities <i>Johannes Leskens, Marcel Boomgaard, Conny van Zuijlen, Peter Hollanders</i>	145
CORFU project experience from the rapidly developing city of Dhaka, Bangladesh <i>S. M. Mahbubur Rahman, David M. Khan, Abu Saleh Khan, M. Monowar Hossain</i>	147
Surface water flood warnings in England: An overview, assessment and recommendations based on survey responses and workshops <i>Susana Ochoa-Rodriguez, Laurie Thraves, Andy Johnston</i>	149
Building urban resilience with flood defense and critical infrastructure network assets <i>Damien Serre, Mireia Balsells</i>	151

Monitoring SUDS at Lamb Drove, Cambridgeshire <i>Richard Stevens, Fola Ogunyoye</i>	153
Flood preparedness of private households and small businesses in the Mekong Delta, Vietnam <i>Heidi Kreibich, Philip Bubeck, Chinh Do</i>	155
Public attitudes towards flooding and property level flood protection measures <i>Seth Owusu, Grant Wright, Scott Arthur</i>	157
Urban design contribution to neighbourhood flood resilience: Proposition of a model analysis <i>Mireia Balsells, Bruno Barroca, Youssef Diab, Vincent Becue, Damien Serre</i>	159
Effectiveness of flood resilience measures for Incheon Gyo watershed in Korea <i>Lian Guey Ler, Gyewoon Choi, Seong Joon Byeon</i>	161
D. FLOOD FORECASTING, ANALYSIS AND MODELLING	163
D1. ADVANCES IN HYDROLOGICAL MODELLING	
Statistical downscaling methods for climate change impact assessment on rainfall for cities in tropical developing countries – a review <i>Seith Mugume, Diego Gomez, David Butler</i>	165
Analysis of Beijing rainfall patterns, based on 68 years of rainfall data <i>Yuwen Zhou, Zilong Liu, Shanshan Liu, Yaoyao Weng, Ying Tang</i>	167
Comparison of different radar-gauge merging techniques <i>Nergui Nanding, Miguel Angel Rico-Ramirez, Dawei Han</i>	169
Hydrological modelling for simulation of flooding from extreme events in Jamaica – case study of the Hope River watershed <i>Arpita Mandal, Lawrence Barrett, David Smith</i>	171
Extreme precipitation for Jamaica: 1895 to 2100 <i>Christopher P. Burgess, Michael A. Taylor, Tannecia Stephenson, Arpita Mandal</i>	173
D2. FLOOD FORECASTING	
* Warning strategy, techniques and new developments at the Flood Forecasting Centre <i>Charlie Pilling, David Price, Steve Ramsdale, Holly Denning, Kathryn Smith, Matt Winter, Bob Moore, Mark van Dijk</i>	175
* Using ensembles to represent uncertainty in UK radar rainfall estimates: some initial findings <i>David Dufton, Chris G. Collier</i>	177
* The use of radar, nowcast and numerical weather prediction in rainfall runoff modelling in Scotland <i>Rachel Geldart, Linda Speight, Mike Cranston, Richard Maxey, Amy Tavendale</i>	179
* A review of kriging based rain-gauge-radar merging techniques <i>Sharon Jewell, Nicolas Gaussiat</i>	181
* Probabilistic flood forecasting using high-resolution ensemble rainfalls over Britain <i>Adrian Wynn, Clive Pierce, Robert J. Moore, Steven J. Cole, David Price, Marion Mittermaier, Alan Seed</i>	183

* Hydrological value of low-cost X-band radars for heavy rain hazard assessment in urban areas: Demonstration experiment in Barcelona <i>Daniel Sempere-Torres, Marc Berenguer, Monika Pfeifer</i>	185
* Comparison of the Met Office conventional and experimental NWP based nowcasting of precipitation for flash flood events during summer 2012 <i>Susan P Ballard, Clive Pierce, David Simonin, Nigel Roberts, Zhihong Li</i>	187
Ensemble model water level forecasts for the lower Mekong <i>Lan Yu, Lloyd H. C. Chua</i>	189
Striving for sufficient lead time of flood forecasts via integrated hydro-meteorological intelligence <i>Dong-Sin Shih, Cheng-Hsin Chen</i>	191
Getting started with urban flood modelling for real-time pluvial flood forecasting: a case study with sparse data <i>Jeanne-Rose René, Slobodan Djordjević, David Butler, Henrik Madsen, Ole Mark</i>	193
Identification of uncertainty sources in flood forecasting <i>Niels Van Steenberghe, Patrick Willems, Maarten Deschamps</i>	195
Establishment and application of urban area early warning system for short-duration heavy rainfall <i>Sheng-Hsueh Yang, Wei-Chu Weng, Yung-Chia Hsu, Keh-Chia Yeh, Shenq-Yuh Jaw, Meng-Chi Hung</i>	197
D3. ADVANCES IN FLOOD MODELLING	
* Evaluation of satellite-based extreme precipitation estimates for flood risk modelling <i>Bastian Manz, Wouter Buytaert, Juan Pablo Rodriguez Sanchez</i>	199
* Understanding the hydraulic state and drainage capacity of a stormwater system through modelling <i>Yuwen Zhou, Hongli Wang, Jian Zhao, Ying Tang, Chang Liu</i>	201
* Urban flood modelling using cloud computing <i>Vassilis Glenis, Vedrana Kutija, Chris Kilsby, Andrew McGough, Simon Woodman</i>	203
* Flood routing using alternative approach of neural network for a flood warning system (case study: Madarsou River, Iran) <i>Ahmad Tahershamsi, Farhad Hooshyaripor, Hosein Ghalkhani, Abdollah Ardeshir</i>	205
* Flood control operation of reservoir systems using system dynamics-based simulation optimization <i>M. Hosseini, S. Jamshid Mousavi, Abdollah Ardeshir, Kourosh Behzadian</i>	207
* MH-AssimTool: an assimilation tool dedicated to a fully distributed model <i>Julien Richard, Agathe Giangola-Murzyn, Daniel Schertzer, Ioulia Tchiguirinskaia</i>	209
* Case study of dam breach and flood analysis <i>Suk-Hwan Jang</i>	211
Experimental study on floating cars in flood water <i>Keiichi Toda, Taisuke Ishigaki, Taira Ozaki</i>	213
Towards the development of a decision support system for flood management in Chao Phraya river basin, Thailand <i>Piyamarn Sisomphon, Surajate Boonya-aroonnet, Somchai Chonwattana, Finn Hansen</i>	215

A flexible hydrodynamic modelling framework for GPUs and CPUs: application to the Carlisle 2005 floods <i>Luke S. Smith, Qihua Liang, Paul F. Quinn</i>	217
Dam break waves as extreme flood events <i>Antje Bornschein</i>	219
Comparing topography discretization techniques for Godunov-based shallow flow models <i>Georges Kesserwani</i>	221
Comparison of numerical schemes for modelling supercritical flows along urban floodplains <i>Yared A. Abebe, Zoran Vojinović, Solomon D. Seyoum, Roland K. Price</i>	223
Prediction of overbank flows with a coupled 1D flash flood routing model and 3D coastal ocean model <i>Wen-Cheng Liu, Chung-En Chung, Ming-Hsi Hsu</i>	225
Well balanced Roe scheme applied to a local inertia overland flow model <i>Ricardo Martins, Jorge Leandro, Slobodan Djordjević</i>	227
Implementation and assessment of a critical input hyetograph generation methodology for use in a decision support tool for the design of flood attenuation systems <i>Christopher Newton, Daniel Jarman, Fayyaz Ali Memon, Robert Andoh, David Butler</i>	229
D4. ANALYSIS OF URBAN FLOODING	
Influence of wind-driven rain on the hydrologic response of urban areas: A physical model <i>Jorge M. G. P. Isidoro, João L. M. P. de Lima</i>	231
Surface drainage system efficiency and its impact on pluvial flooding: A physically-based stochastic approach <i>Anna Palla, Giuseppe T. Aronica, Ilaria Gnecco, Luca G. Lanza</i>	233
100 year flood simulation for Dhaka City using multiple models <i>Ismat Pervin, M. Feroz Islam, Imtiaz Taher, David M. Khan</i>	235
Machine learning-based early warning system for urban flood management <i>Andrew P. Duncan, Edward C. Keedwell, Slobodan Djordjević, Dragan A. Savić</i>	237
Adaptive evacuation planning for flood risk management <i>Bas Kolen</i>	239
Flood vulnerability assessment considering climate change impacts: Application to Barcelona case study using relative depth-damage curves <i>Marc Velasco, Àngels Cabello, Beniamino Russo, Teresa Kersting</i>	241
Extreme hazard of pluvial and tsunami floods in a densely urbanized area <i>Taisuke Ishigaki, Norihiro Asano, Masayuki Morikane, Taira Ozaki, Keiichi Toda</i>	243
Back to the future: assessing the impact of the 2004 flood in Dhaka in 2050 under massive urban growth <i>David M. Khan, Imtiaz Taher, William Veerbeek, Albert S. Chen, Michael J. Hammond, Slobodan Djordjević, David Butler</i>	245

E. SHARED LESSONS AND WAYS FORWARD 247

E1. SHARED LESSONS FROM ASIA AND EUROPE

* Flood preparedness of private households and businesses – a comparison between Vietnam and Germany <i>Chinh Do, Heidi Kreibich</i>	249
* Comparative analysis of flooding in Gothenburg, Sweden and Mumbai, India: A review <i>Johanna Sörensen, Arun Rana</i>	251
* Flood control of an overpass in downtown Beijing <i>Yuwen Zhou, Jian Zhao, Zilong Liu, Wei Li, Jing Zhang, Ying Tang</i>	253
* Modelling the effects of tsunami-induced forces on building facades <i>Jorge M. G. P. Isidoro, João M. C. Estêvão</i>	255
* Water circulation study for the development of Songdo waterfront canal system <i>Dongwoo Jang, Cristina Agafon, Gyewoon Choi</i>	257
* Community led model of flood resilient, sustainable shelter construction in Sindh Province, Pakistan <i>Bee Rowan</i>	259
Performance of sustainable drainage for urban flood control, lessons from Europe and Asia <i>Carly Rose, Jessica Lamond</i>	261
Strategy to enhance community preparedness in flood resiliency: Bangladesh experience <i>M. A. Quassem, Md. Waji Ullah, Muhammad Shifuddin Mahmud, Mobasher Bin Ansari</i>	263
Thinking more broadly about flood resilience <i>Fola Ogunyoye, Nanco Dolman</i>	265
New guidelines for flood flow assessment at hydrologic stations in Serbia <i>Borislava Blagojević, Vladislava Mihailović, Jasna Plavšić</i>	267
Interaction between urban spatial organization and flood risk – Taipei case study (1895-1945) <i>Fang-Yu Hu, Nathalie Lancret, Gilles Hubert</i>	269

E2. NEW PROJECTS AND INITIATIVES

* Strengthening and redesigning European flood risk practices (STAR-FLOOD): Towards appropriate and resilient flood risk governance arrangements <i>Dries Hegger, Peter Driessen, Carel Dieperink, Mark Wiering, Tom Raadgever, Marleen van Rijswick</i>	271
** Global flood partnership <i>Tom De Groeve, Jutta Thielen</i>	273

AUTHOR INDEX 275
